Senior Full-Stack Engineer | Tech Lead | System Design
& Scalable Platforms (9+ Years)

ABOUT ME

Senior Full-Stack Engineer & Tech Lead with 9+ years building scalable e-commerce and enterprise platforms. Specialize in Elasticsearch search optimization, legacy-to-modern migrations, and high-traffic system design — with hands-on delivery across 1M+ product catalogs and multi-seller platforms.

EDUCATION

2018 – 2022

IGNOU University

Master of Computer Applications

Built alumni.ignou.ac.in Alumni Portal serving 5.2M+ users
Created chatbot for IGNOU study center to assist students with academic queries

2014 – 2017

Bhavans College

Mumbai University

Bachelor of Science in Information Technology

Student of the Year • Received Kulpati Award for academic excellence

EXPERIENCE

OCT 2023 – NOW

eClerx

Sr Software Engineer (Career transition — extended interview & joining process)

- Designed and optimized Elasticsearch-based search systems for high-traffic platforms
- Improved query performance and relevance tuning for better user experience
- Managed deployments and system reliability on AWS infrastructure
- Optimized Elasticsearch queries improving search latency and relevance

APR 2021 – JUL 2023

Medikabazaar

Full Stack Developer

- Built and scaled a full-stack platform managing 1M+ product catalog with multi-seller onboarding
- Led migration of legacy Magento platform to Next.js + Python architecture, improving scalability and performance
- Implemented Elasticsearch-based search system, significantly enhancing search speed and relevance
- Designed backend systems using Django, Celery, RabbitMQ, Redis for async processing and high throughput
- Managed high-traffic infrastructure on AWS (EC2, S3, CloudFront) with reliable deployments
- Integrated real-time features using sockets and improved system responsiveness

OCT 2019 – APR 2021

CitiusTech

Software Engineer

- Contributed to large-scale healthcare platforms (H-Scale, IBC Migration)
- Improved code quality and maintainability using SonarQube integration
- Built scalable frontend components using Angular and Node.js

SEP 2017 – OCT 2019

AvenDATA GmbH

Software Engineer

- Progressed to Team Lead, managing development and delivery of multiple projects
- Led full-stack development across Python, Django, React, Node.js and other technologies
- Migrated legacy Python 2 systems to modern architecture, improving maintainability
- Developed NFC-based mobile applications using Ionic framework
- Delivered projects including Digiprax, Baulogi, PhoneBoost, and BetHai

SKILLS

Backend: Python, Django, Flask

Frontend: Next.js, React.js

Databases: PostgreSQL, MySQL, MongoDB

Search: Elasticsearch (Indexing, Query Optimization, Relevance Tuning)

APIs: REST APIs, API Design

Architecture: Microservices, Distributed Systems

Infra & Tools: AWS, GCP, Redis, Celery, RabbitMQ

Core: System Design, Scalability, Team Leadership

DevOps / Deployment: CI/CD, Nginx, Docker

KEY PROJECTS

Elasticsearch Search Platform (Ricoh USA & Canada)

- Built scalable search layer improving product discovery and relevance
- Handled large product indexing and query optimization

Medikabazaar E-commerce Platform

- Migrated Magento → Next.js + Python architecture
- Managed 1M+ product catalog with multi-seller onboarding
- Improved system performance and search experience

TECHNICAL ACHIEVEMENTS

- Designed and scaled systems handling 1M+ product catalog
- Built Elasticsearch-driven search systems for e-commerce platforms
- Migrated legacy monolith systems to modern scalable architecture
- Improved performance of high-traffic applications under production load
- Built async processing systems using Celery + RabbitMQ

LEADERSHIP & IMPACT

- Led a team of 4 engineers across multiple enterprise projects
- Collaborated with cross-functional teams and external agencies
- Owned end-to-end delivery of production systems
- Mentored junior developers and improved engineering practices
